

Plenary Lecture entitled “Importance of Forensic Science “ at DAV College , Amritsar

A Plenary lecture was delivered by DR. GS Sodhi on the “Importance of Forensic Science “ at DAV College , Amritsar, wherein he got the students acquainted with the various applications and the increasing importance in the field of forensics.

He highlighted several imported features viz.,

- Analysis of forensic evidence is used in the investigation and prosecution of civil and criminal proceedings. Often, it can help to establish the guilt or innocence of possible suspects.
- Forensic evidence is also used to link crimes that are thought to be related to one another. For example, DNA evidence can link one offender to several different crimes or crime scenes (or exonerate the accused). Linking crimes helps law enforcement authorities to narrow the range of possible suspects and to establish patterns of for crimes, which are useful in identifying and prosecuting suspects.
- Forensic scientists also work on developing new techniques and procedures for the collection and analysis of evidence. In this manner, new technology can be used and refined not only to keep forensic scientist on the cutting edge of science, but to maintain the highest standards of quality and accuracy.
