

Internal Assessment in Paper CS-701: Artificial Intelligence

1. Test on October 26, 2016 for **10 Marks** from Complete Syllabus. Actual test marks may be nominally more, which will be normalized to 10 relatively, considering statistical spread and location.

Questions shall be on knowledge and comprehension (30%), in-depth understanding of concepts (30%), Small Applications (40%).

2. Class Presentation of Course Projects in Artificial Intelligence, as per the pre-decided topics, for **15 Marks.**

Presentation shall commence from October 21, 2016 during the class hours, as per the mutually agreed upon schedule (to be decided). Each group to present their work in 30-45 minutes including interactions and feedback.

3. Lab associated with Artificial Intelligence, for **25 Marks.** Marks proportional to efforts and accurate application of concepts and techniques learned in the course. (Consistence of work – 5, originality -5, design considerations -5, degree of goal achievement – 5, analysis of work done -5)

Overall, professionalism of approach, precision, and demonstration of sound analytical skills and corresponding effective synthesis shall be the basis of award of marks.

Any component intentionally neglected by a student shall get no credit, that is zero marks will be awarded for it.
